
Knowtion Health Demonstrates Strength of Security Protocols with SOC 2 Audit

The cybersecurity audit provides assurance that Knowtion Health complies with industry standards for protecting sensitive data.

BOCA RATON, Florida – May 22, 2025 – Knowtion Health announced today the successful completion of its SOC 2®, Type 2 audit, a security compliance review that substantiates best practices for protecting healthcare data. In an era of increasing cyberthreats, the SOC 2 audit affirms the company's commitment to critical security standards for protecting and securing client data.

Established by the American Institute of Certified Public Accountants (AICPA), the SOC 2 examination is designed for organizations of any size, regardless of industry and scope, to ensure the personal assets of their potential and existing customers are protected. SOC 2 reports are recognized globally and affirm that a company's infrastructure, software, people, data, policies, procedures and operations have been formally reviewed.

The SOC 2 review was conducted by A-LIGN, a technology-enabled security and compliance partner. It is a widely recognized signal of trust and security.

“Our latest SOC 2 audit underscores Knowtion Health's steadfast commitment to upholding the highest standards of data security and compliance,” said Jayson Yardley, CEO of Knowtion Health. “With data breaches continuing to challenge the healthcare landscape, we take a proactive approach to protecting our clients' sensitive information. Ensuring that our security protocols align with the standards of the SOC 2 review, a widely recognized signal of trust and security, we affirm our partners can count on us maintaining best practices to safeguard what matters most.”

Knowtion Health is dedicated to threat prevention. The company invests in compliant workflows as well as email, text and IVR capabilities and regularly monitors payer regulations and legal oversight to ensure the services it provides meet industry standards for data security and protection. Knowtion Health engages A-LIGN to perform a SOC 2 assessment on an annual basis. The audit report is available to current and potential customers upon execution of a non-disclosure agreement.

Knowtion Health serves more than 500 hospitals nationwide and manages over \$4.6 billion annually in outstanding balance accounts for clients. Find out more at knowtionhealth.com.
